

Calling all Science Teachers!

SAC seeks to inspire the next generation of scientists!

SAC is pleased to announce its third annual Science for Schools Event on Tuesday 20th March 2012 at the Roslin Institute, Easter Bush, Midlothian.

SAC, Scotland's land-based Higher Education Institution, invites fifth year science students and accompanying teachers to a day of presentations/demonstrations from leading researchers and practitioners, and scientific debate on issues and conflicts surrounding global food production for the 21st Century.

The morning will provide the opportunity for students to engage with researchers and scientists at this world class research centre through a range of demonstrations and presentations.

There will then be a plenary session with three speakers followed by an audience-led participative debate – providing a forum for topical, stimulating, intellectual and critical discussion.
